

Application No.: 09/894,912

Docket No.: 30266/37260A

AMENDMENT

IN THE CLAIMS

Please cancel claims 1-61 and 66-73, without prejudice, as they are directed to a non-elected invention. Please amend claims 62, 64 and 65 and new claims 74-75 as follows.

191

- 62. (Amended) A method of supporting proliferation or survival of a stem cell or germ cell comprising contacting said cell with an amount of a polypeptide having an amino acid sequence at least 85% identical to SEQ ID NO: 13 or the mature protein coding portion thereof, wherein said amount is effective to maintain survival of or promote proliferation of said cell.
- 64. (amended) The method of claim 62, wherein the polypeptide comprises the amino acid sequence of SEQ ID NO: 13, or the mature protein coding portion thereof.

By

65. (amended) The method of supporting proliferation or survival of a stem cell or germ cell comprising contacting said cell with an amount of a polypeptide, wherein the polypeptide is encoded by a polynucleotide that hybridizes to the complement of the nucleotide sequence of SEQ ID NO: 12, or the mature protein coding portion thereof, under the following stringent conditions: a final wash of 0.1x SSC/0.1% SDS at 68°C,

wherein the amount is effective to maintain survival of or promote proliferation of said cell.

- 74. (new) The method of claim 62, wherein the polypeptide comprises the amino acid sequence of SEQ ID NO: 32, or the mature protein coding portion thereof.
- 75. (new) The method of claim 62, wherein the polypeptide comprises the amino acid sequence of SEQ ID NO: 34, or the mature protein coding portion thereof.
